Portfolio website

Largely self taught full stack software developer. I have good confidence in what I know and never wanna miss out on an Opportunity to learn new things.

Currently learning,

Advanced heuristic algorithms and secure Single page applications using JWT and Opaque tokens.

What I use,

Core : NodeJs : Express, MVC & Dependency Injection
Database : MongoDB : Mongoose, SQL, TypeORM
UI/UX : Angular : NGRX, NGXS, Angular Material
Mobile : Flutter : RXDART
Data : Python : Flask / Django
TDD : Mocha, Chai, Cypress, Pyunit
DevOps: Docker , K8s and Google Cloud platform (Cloudrun and GKE), Firebase, Redis
Platforms : Win, Unix
Practices : Oauth2, TDD

What I'm really good at,

Building **scalable code** infrastructure in Node.js . If you want it done in JS or TS i can do it.

Something you should know about me,

I've worked mostly remotely and I do by far prefer it though appearing physically isn't out of the equation.
I enjoy solving complex problems innovatively

AWARDS

Not won a lot of awards though i do have a GDSC core team certificate for MKU GDSC 2020-2021 - it was a good experience teaching and learning from others

LANGUAGES

Fluent English (9.3 C2-C1)
